## Self Cleaning Screens

AEG Self Cleaning Screens compose of individual wires that vibrate independently at different frequencies preventing material from accumulating between the wires and allowing the self cleaning effect. With 1/3 more open area than square mesh production increases of up to 30% have been achieved.

- Offer more production on lighter material whilst eliminating plugging and clogging elements.

**Side Tensioned**

**End Tensioned**

## Polyurethane Type

- Polyurethane poured into strip form to increase wear resistant qualities

\*Extensive range of aperture sizes and hook styles to suit any requirements
