

MAGNETIC POLYURETHANE LINERS

AEG Magnetic Polyurethane liners are high quality, resilient cast polyurethane, they are available in various Shore Hardness's and thicknesses. AEG Poly Sheets provide excellent resistance to abrasive and impact wear in raw material handling.

The self-indicating layer (1/3 yellow) on sheets over 16mm thick provides preventative maintenance capabilities. Due to the flexibility of these liners they can be installed on slightly curved surfaces.

Benefits:

- Superior ABRASIVE wear resistance due to polymer material
- Weight (6x lighter than steel)
- Superior IMPACT resistance and resilience
- Superior SLIDING co-efficiency
- Ease of handling & installation
- No permits required
- No tools required
- Flexibility
- Noise reduction
- No corrosion
